Subject: Jeff Wheat Recommendation

memorandum

Chemical Science and Engineering

To whom it may concern,

I am a Staff Scientist at Los Alamos National Laboratory and it is indeed a pleasure to write this letter in support of Jeffery Wheat. I was Jeff's supervisor for the last three years of his employment as an Electro-Mechanical Technician here at Los Alamos, and noted during that time Jeff has an extraordinary work ethic coupled with an extremely high level of competence. His efforts, attitude and quality of work represents the highest standard Los Alamos has to offer. Further, He routinely accepted the challenges placed on him with the highest degree of professionalism and collaborated well with all levels of LANL employees and customers. Jeff worked on a diverse array of projects for me, where his skills in computer programming, data acquisition and automation, custom part fabrication, chemical and biological analysis, computer aided design, and electronics diagnostic and trouble-shooting (to name just a few) was invaluable. I found Jeff to be self-sufficient, while performing his assignments with a genuine attitude of excellence and humility. Over and over Jeff demonstrated his high degree of integrity by routinely going that extra mile to insure the work and products he delivered were of the highest quality. Jeff has been a pleasure to work with and I have nothing but compliments regarding the work he has performed for me. I very much look forward to future professional interactions with Jeff.

Sincerely,

Peter Stark
Technical Staff Member
Los Alamos National Laboratory
